

## FAQS

Who are the best candidates for SmartLipo?

Any individual who:

- Has tried to eliminate bulges through diet, exercise and weight loss.
- Has distinct areas of localized fat that are disproportionate to the rest of their bodies

Is the fat removal permanent?

The fat removal is permanent. Should you gain weight, the fat will return to the areas not treated with the laser.

What will my downtime look like?

Patients who receive SmartLipo are usually back to work within days.

You will go home after the procedure and rest for several hours, after which you may gradually increase your activity as tolerated. A compression garment will be placed over the area for several days to several weeks depending on the area treated. Refrain from strenuous exercise for several weeks.

# Smartlipo®

## LASER LIPOSUCTION

For quicker, more effective results.

# What is SmartLipo?

SmartLipo uses a laser to rapidly dissolve fat and tighten the surrounding skin almost anywhere in the body. Now FDA-approved, this revolutionary and minimally invasive procedure offers less bleeding, swelling, bruising and a quicker recovery time than conventional liposuction.

Using local anesthesia, the procedure is performed with a small canula that contains a laser fiber that when moved back and forth the laser energy dissolves fat and stimulates the tightening of surrounding skin.

## Why SmartLipo over other procedures?

- Quicker recovery time
- Minimal scarring, bleeding or bruising
- Smaller incisions
- May treat cellulite and other surface irregularities
- Minimal discomfort
- Local Anesthesia
- Often provides skin tissue tightening
